

# GSA® - HBV

These composite decks have a few advantages:

- High load-bearing capacity with a considerable low weight (ideal for large spans)
- Space for installations between the beams
- High slab rigidity (diaphragm)
- Good performance in terms of sound & fire protection
- Possible heat storage

[more Infos](#)

Advantages of the GSA®-HBV Shear connectors in particular:

- High and rigid capacity to transfer the shear flow between concrete and timber.
- Ductile behaviour of the shear connectors.
